## SEN Hosts: "A DAY WITH THE DEPUTY AND MINISTER OF ENVIRONMENT"

Over twenty-five people from 15 environmental not-for-profits gathered at the Environmental Resource Centre (ERC) on January 8<sup>th</sup> to meet with David Forbes (Minister of Environment) and Lily Stonehouse (Deputy Minister). Assistant Deputy Bob Ruggles and assistant to the Deputy John Vandal also attended.

The event began with a tour of the working space that seven organizations share within the ERC: SEN, SES, CPAWS, SWRC, CPAWS, Oxfam, Core Neighbourhood Youth Co-op and Nature Saskatoon. We then met in a facilitated discussion, led by Alan Appleby, on "Northern" issues, focusing on forestry and land use.

Individuals spoke about their work and hopes for more connected protected areas within the shield and boreal forest. Without connected areas, biodiversity will not survive in the long term. Emphasis was placed on the importance of consultations with First Nations communities and the goal to look at land use planning from a balanced perspective on the social-economic-cultural and environmental points. In looking at these balanced approaches, we need to shift the paradigms of the past to one which sees the health of communities and how that is linked to the environment. Historically, industry has been given a wider grid for opportunity, than wildlife and habitat. Mining in particular was implicated in this.

In the afternoon, there was a lively discussion facilitated by Cathy Holtlander on "Southern" issues; predominantly hog barn, water issues and protected areas. Environmentalists representing rural groups spoke passionately about the demise of rural communities and the toxic effects on water and environments from intensive livestock operations. The afternoon discussion concluded with discussions on protected areas in the southern part of the province, such as the Great Sand Hills, and the positive changes that have evolved over the years. Commitment needs to be ongoing with special interest paid by the department towards climate change and what that will mean not only for these areas, but the province as a whole.

The day concluded with Ms. Stonehouse's remarks about the necessity of an ongoing dialogue between the ENGO community (enviro non-governmental organizations) and government departments. She acknowledged the effort needs to be stepped-up in more departments, as environment affects every aspect of our lives. The monitoring and reporting information needs to be more utilized, with increased public access to it, in order to make the province have stronger policies on the environment. As Minister Forbes commented, "The new government under Calvert is committed to a green economy." Let's hope "green" has as much influence in policy and practice as "economy"! 🌱

### SEN Welcomes New Member Groups

SEN is pleased to announce that the **Beyond Factory Farming Coalition** and the **Craik Sustainable Living Project** have joined our network.

For more about these two new groups and their activities, please see pages 2 and 3.

## BEYOND FACTORY FARMING COALITION: *Growing and Going Places*

The Beyond Factory Farming Coalition continues to grow. As of early February, we have six national organizations: Global Resource Action Center on the Environment, the Council of Canadians, the Canadian Labour Congress, the National Farmers Union, the Sierra Club of Canada and the Canadian Organic Growers; as well as nine provincial groups including the Stop the Hogs Coalition, the Saskatchewan Federation of Labour and the Back to the Farm Research Foundation from Saskatchewan, and nine local groups, with the Regina Humane Society and Concerned Citizens for a Safe and Healthy Environment from Saskatchewan. There is still room for your group! Contact me if you want information about how to join.

We've launched our website [www.beyondfactoryfarming.org](http://www.beyondfactoryfarming.org). Check it out, and if you know of interesting links or documents that you'd like to share with friends in cyberspace, let me know.

On January 28 the Beyond Factory Farming Coalition, along with GRACE, the Council of Canadians and the Toronto Food Policy Council, co-sponsored a public Forum at St. Lawrence Centre Forum in Toronto which was called Our Food, Our Health, Our Environment. Don Mills, from the NFU, Maureen Reilly from the Sierra Club, Jim Dalrymple, an agriculture consultant, and Bill Weida from GRACE spoke and answered audience questions. You can listen to the forum at <http://forum.stlc.com/audio.php>. It was great to have over 300 Torontonians come out on a snowy night for the event. It shows there is huge interest in factory  farming issues all over the country, even in our biggest  city!

For more information contact:  
Cathy Holtlander, Project Organizer  
Beyond Factory Farming Coalition  
[choltlander@canadians.org](mailto:choltlander@canadians.org) or 1-877-955-6454

### Coalition Members

*as of February 2004*

#### National Groups:

GRACE-Global Resource Action Center on the Environment (Canada and USA)  
Council of Canadians  
Canadian Labour Congress  
National Farmers Union  
Sierra Club of Canada  
Canadian Organic Growers

#### Provincial Groups:

SERLO-Society for Environmental Responsible Livestock Operations (AB)  
Hogwatch Manitoba  
Hogwatch Ontario  
Union Paysanne (PQ)  
Stop the Hogs Coalition (SK)  
Association for the Protection of the Bouctouche Watershed (NB)  
Ecological Farmers Association of Ontario  
Saskatchewan Federation of Labour  
Back to the Farm Research Foundation (SK)

#### Local Groups:

Concerned Citizens of Thames Centre (ON)  
Regina Humane Society  
Roseisle Creek Watershed Association (MN)  
CREEK-County Regional Environmental Evaluation Coalition (ON)  
Citizens for the Environment & Future in Eastern Ontario  
Hogwatch Haldimand (ON)  
Concerned Citizens of North Glengarry (ON)  
Concerned Citizens of the Municipality of Kincardine (ON)  
Concerned Citizens for a Safe & Healthy Environment (SK)

### *The Beyond Factory Farming Coalition...*

*Our vision is "Livestock Production for Health and Social Justice"*

*Our mission is "To promote livestock production that supports food sovereignty, ecological, human and animal health as well as local sustainability and community viability and informed citizen/consumer choice."*

The Coalition organizes local, provincial and national groups active in all areas of concern.

Coalition members support action campaigns to:

- ◆ Stop the expansion of Intensive Livestock Operations (ILOs)
- ◆ Protect our water from pollution and depletion by ILOs
- ◆ Stop the over use of antibiotics in feed
- ◆ Promote urban awareness
- ◆ Support rural communities
- ◆ Expose corporate globalization and its dominance in the livestock sector

# Craik Sustainable Living Project

In 2001, the Town of Craik and the Rural Municipality of Craik No. 222 began working in partnership to develop a long-term plan for a sustainable community-based project.

The goal of the Craik Sustainable Living Project (CSLP) is to advance local use of more ecologically sound technologies and ways of living, and also to serve as a model inspiring and enabling positive change in other communities in western Canada and elsewhere. The Project aims to demonstrate a wide range of sustainable alternatives related to land use, food & fibre production, shelter, energy generation & conservation, water & waste management, and recycling.

There are four inter-related aspects of the project:

- 1) **the Ecocentre** – a multi-purpose facility currently under construction, featuring innovative and energy efficient building design and integrated renewable energy systems, that will serve as a focal point for indoor and outdoor demonstrations and educational programming on environmental sustainability,
- 2) **Education Programming** – for children, youth, and adults on climate change, renewable energy options, ecology and local history,
- 3) **Community Action** – reducing the size of individual and the community's "ecological footprint" through retrofitting of public and private buildings, improvements to waste and water management, recycling programs and transportation options,
- 4) **Ecovillage** – the creation of a new sustainable housing development or ecovillage, consisting initially of 10 to 12 families living sustainably in energy efficient housing and potentially utilizing the land base to make a living.

We believe that this initiative has the potential to be a leading example for communities seeking to move into a new period of revitalization and sustainability. For further details on the phases of the project and progress to date, please refer to the website [www.craiecovillage.ca](http://www.craiecovillage.ca). To find out how you can support and become involved, contact Mary Beckie, CSLP Coordinator at 306-665-8103 or [mbeckie@sasktel.net](mailto:mbeckie@sasktel.net), or Shirley Eade, Town of Craik Administrator at 306-734-2250 or [town.craik@sasktel.net](mailto:town.craik@sasktel.net).

Please see the **Craik Sustainable Living Project's Seminar Series** for some exciting events (page 5).

## ACTION ALERT

The InterChurch Uranium Committee Educational Co-op is encouraging individuals to check out SEN's website link to "Action Alert" for information on the American Nuclear Information and Resource Service's (NIRS) campaign to intervene and challenge permits for new nuclear reactors planned in 3 states, creating a resurgence of the nuclear power industry in the U.S.

Check it out at: [www.econet.sk.ca](http://www.econet.sk.ca)

**Saskatchewan Eco-Network**

# 2004 NESS CREEK MUSIC FESTIVAL

JULY 15 TO 18

Tickets are now on sale for the 14<sup>th</sup> Annual Ness Creek Music Festival. The four-day Festival of music and culture from Saskatchewan and around the world takes place July 15 through 18, 2004, on a pristine camping site 20 km northeast of Big River, SK, bordering on the west side of Prince Albert National Park.

Early confirmations for this year's Festival include electrifying blues and roots singer **Ruthie Foster**, funk-jazz fusion septet **The Pocket Dwellers** and Metis/Native songwriter **Sandy Scofield**. See below for more about these artists.

Earlybird tickets are available until May 15 for \$50 (including GST with no service charges) at the following locations:

*In Saskatoon:*

**H.E.L. Music Supplies**, 630 Broadway Ave, 244-6319

**The Vinyl Exchange**, 128 2<sup>nd</sup> Ave North, 244-7090

*In Regina:*

**Bach and Beyond**, 1825 Hamilton St, 347-BACH (2224)

**Eat Healthy Foods**, 3030 12th Ave, 522-4167

*In Prince Albert:*

**Shananigan's Coffee & Dessert Bar**, 2144-6th Ave W, 764-2647

*In Big River:*

**Porter's Printing**, 306-469-5668

Visit the Ness Creek Music Festival website at [www.nesscreek.com](http://www.nesscreek.com) for more information and updates to this year's Festival lineup, or call the Saskatoon office at 652-6377.

## SEEDY SATURDAY!

All are welcome to take part in Saskatoon's Sixth Annual Seedy Saturday on April 3, 2004, between 10am and 5pm, at St. Mary's Church Hall, at the corner of 20th Street West and Avenue O South.

Seedy Saturday takes place in cities all across Canada, and is sponsored by Seeds of Diversity Canada, which works to conserve, preserve, and enhance the diversity of open-pollinated plants.

Seedy Saturday encourages gardeners to collect seed and share it with others through the Seedy Saturday seed exchange table. Along with interesting displays, seed suppliers, and the seed exchange table, there will be a compost tea workshop, as well as a great line-up of speakers on a wide range of topics. Lunch will be available.

*Seedy Saturday is a non-profit event organized by volunteers, and supported by CHEP, Oxfam, the Saskatoon Food Coalition, and others.*

# UPCOMING EVENTS

## Feb 19 to 21: 75<sup>th</sup> SWF Annual Convention

Saskatchewan Wildlife Federation will be holding convention at the Saskatoon Centennial Auditorium. For more information please email [swild@sasktel.net](mailto:swild@sasktel.net) or call 242-1666.

## Feb 21: 12<sup>th</sup> Annual Bruce McDonald Curling Funspiel

Ness Creek Cultural & Recreational Society presents its annual event at the Granite Curling Club (480 - 1<sup>st</sup> Ave. N, Saskatoon). To register teams (\$20/person or \$80/team) or for more information, call 652-NESS (6377). Price includes evening dance at Amigo's.

## Mar 5: Global Citizens Awards Ceremony

4 pm, St. Mary's High School, 380 14<sup>th</sup> Street West, Prince Albert. Join Sask. Council of International Cooperation in recognizing Christine Zyla, and her tireless work for social justice and peace.

## Mar 7 & 18: Spring Waste Minimization Forum

Moose Jaw, Temple Gardens Mineral Spa. Sponsored by the Saskatchewan Waste Reduction Council. Workshops on electronics recycling, computer re-use, the SCALA Project (Engineers without Borders) Climate Change and more. For more information please call 931-3242 or email [swrc@link.ca](mailto:swrc@link.ca)

## Apr 3: Seedy Saturday

The 6<sup>th</sup> Annual Seedy Saturday will be held on April 3, 10am to 5pm, at St. Mary's Church Hall in Saskatoon (corner of Ave P and 20th St). Seed exchange table, eco-fair, & workshops.

## Apr 5: SES Annual General Meeting

Saskatchewan Environmental Society will be holding its AGM at the Unitarian Centre (912 Idylwyld Dr. N., Saskatoon) at 7 pm.

## April 22: Earth Day

Celebrate Earth Day (and every day) ... you can post your organization's event online at the Canada-wide website for Earth Day by emailing <http://www.earthday.ca/Edy2k/Events/register.htm> or let SEN know and we'll post it on our website!!

## May 14 to 16: People and the Planet Conference

Hosted by Sierra Club of Canada, Calgary, Ab. Speakers include Naomi Klein, Maude Barlow, David Orten, Andrew Nikiforuk, Ken Wiwi, Elizabeth May, Jerry Mander and others. Topics include climate change, water, biodiversity, food safety, sustainable agriculture, etc. Contact Angela Rickman, email: [peopleandtheplanet@ca.inter.net](mailto:peopleandtheplanet@ca.inter.net) (1-888-810-4204)

## June 18 to 20: Annual Spring Meet

Nature Saskatchewan will be presenting its Spring Meet in St Walburg area (86 km northeast of Lloydminster). Featured guests are John Acorn, insect ecologist, science consultant, author and host of tv's "Acorn, The Nature Nut"; and Heinjo Lahring, author of new Canadian Plains Research Centre publication, *Water and Wetland Plants of the Prairie Provinces*. For more info, call 780-9293 or email: [info@naturesask.com](mailto:info@naturesask.com).

## Craik's Sustainable Rural Alternatives Seminar Series

The Craik Sustainable Living Project has just recently launched the Sustainable Rural Alternatives Seminar Series, from Jan to April '04 in the town of Craik. This seminar series will present information on more ecologically sound technologies, and more sustainable ways of farming and living. The seminars are held at the Craik Lions Hall. Admission is \$10 per seminar.

Please register with Carmen Bell at 306-734-5192, ([carmenbell@sasktel.net](mailto:carmenbell@sasktel.net)) a few days before the event.

Upcoming seminars are as follows:

Feb 17, 7pm, "**Solar Technologies - Applications for Farm and Home**", Ken Kelln, Kelln Solar

Feb 28, 1pm, "**New Approaches to Animal Husbandry, Organic Livestock Production and Marketing**", Dillon Biggs, Alberta

Mar 13, 10 am, "**Weatherdancer Wind Power Project**", William Big Bull, Piikuni Utilities Corporation, Brocket, Alberta

March 15, 2004, 7pm, "**Domestic Fruit Production and Farmer Cooperatives**", Dr. Bob Bors, Plant Sciences, College of Agriculture, University of Saskatchewan

Mar 29, 7pm, "**The Holistic Resource Management Approach to Farming and Family Life**", Bob Siemens, Fiske, SK

Apr 3, 10 am, "**Urban Farming**", Wally Satzewich & Gail Vandersteen, Saskatoon

*If you would like a tour of the Craik Ecocentre, please let us know as soon as possible and arrangements can be made to do so before or after the seminar.*

# SASKATCHEWAN IS A BOREAL PROVINCE - Alan Appleby

Ah, Saskatchewan, "Land of Living Skies". Wide open spaces. A Prairie Province. Founded in the homesteads of settlers who tilled the land to produce harvests of golden grain. It's all encapsulated in our flag, the beautiful prairie lily lying over bands of gold and green. Green? Indeed, the "north half" of our provincial flag is green, but that's not the half of it. In fact, almost two-thirds (63.1%) is a part of the boreal forest, the world's largest remaining natural forest. This area increases to over 75% of Saskatchewan if you include the Aspen Parkland landscapes that are the transition between the prairies and the boreal forest. This means that the boreal forest covers a larger percentage of Saskatchewan than it does of Canada.

Saskatchewan is physically less a prairie province than it is a boreal province. Most of our people and industry lie in the prairies. But about 20% of our population lives and works in the boreal forest, including the citizens of our third largest city, Prince Albert. Our boreal forest includes other major centres you would expect, like Meadow Lake, La Ronge, and Hudson Bay, but also many you might not immediately identify as boreal, such as Melfort, Tisdale, Nipawin, and Kamsack. Fourteen of Saskatchewan's political constituencies, about one-quarter of the Legislature, are located in whole or major part within our boreal forest.

You're aware of the value of the boreal forest to our economy as the home of our forestry industries, our hard rock mining, including gold and uranium, and a flourishing tourism and recreation based business sector. But are you familiar with other equally important aspects of the boreal forest? Canada's boreal forest comprises 25% of the remaining large intact forests in the world. That places us on an equal footing with places like Brazil, with its rich and diverse rain forest, better-known but no less important to the health of our planet. The boreal forest is home to 30% of North America's birds. Over a billion songbirds migrate into the boreal forest each spring to breed and raise their young. And 75% of North America's waterfowl rely on Canada's boreal forest for at some point in their lives for breeding, staging and molting.

Other animals of all kinds, many of them symbols of our nation, thrive in the boreal forest. Large mammals such as Caribou and Moose, and small ones like mink and fisher. And speaking of fishing, who doesn't think of the northern woods when they think of going fishing? All our major rivers flow through the boreal forest on some part of their journey to the sea, including the North and South Saskatchewan, the Churchill, the Fond du Lac, and the Clearwater. The boreal forest contains most of our 50,000 lakes and their fish and recreation opportunities. And of course the boreal forest is the home of many people. It is the traditional homeland for most of our First Nations and aboriginal peoples, as well as the home of choice of about 20% of our provincial population.

The boreal forest is an important part of our province, not just for industry, but for environmental reasons as well. If we truly want to have a balanced and sustainable future for our boreal forest, we need a vision to accomplish that goal. That's why the *Boreal Forest Conservation Framework* is so important. On December 1, 2003 the Canadian Boreal Initiative (CBI) released the *Boreal Forest Conservation Framework* – the most extensive national conservation vision ever developed. CBI also formed the *Boreal Leadership Council*, consisting of the signatories to the Framework. This document is based on the best available science, and the best available public policy, including the 1990 Senate Committee on Agriculture and Forestry report "*Competing Realities: The Boreal Forest at Risk*", which recommended that 20% of the boreal forest should be protected from industrial access and use, and a further 60% managed with the preservation of biodiversity as the primary objective.

The Canadian Boreal Conservation Framework was developed in concert with leading conservation organizations, business, and First Nations. This group brings together a wide spectrum of interests in our boreal forest, aboriginal peoples, forest industry, energy industry, academia and environmental groups, all united in their commitment to the conservation and sustainable development of Canada's boreal forest region. By signing the Framework, they became members of the Boreal Leadership Council, an enabling and guiding group. The Canadian Boreal Forest Conservation Framework has as its goal to conserve the cultural, sustainable economic and natural values of the entire Canadian boreal region by employing the principles of conservation biology to:

- protect at least 50% of the region in a network of large interconnected protected areas, and,
- support sustainable communities, world-leading ecosystem-based resource management practices and state-of-the-art stewardship practices in the remaining landscape.

The Framework represents a national vision and goal for the region as a whole, rather than a formula to be applied on a unit-by-unit basis in a particular part of the boreal. In promoting a conservation approach for the entire boreal, the Framework recognizes that conservation challenges and opportunities will vary, but that results are necessary if we are to continue enjoying the many benefits of our boreal heritage.

The boreal forest is important to Canada, and to Saskatchewan. It's more than a green stripe on our flag. It's also a fundamental part of our economy and our natural heritage, a part that will require careful management. The Canadian Boreal Framework provides us with a good basis for future planning and management of the boreal forest, and the hope that we can work together in all parts of the province and society to ensure we always deserve that green stripe on our flag. 🌿

The **Saskatoon Good Food Box** is a non-profit fresh fruit and vegetable distribution system operated by the Child Hunger and Education Program (CHEP). It runs like a large bulk buying club with an added set of goals. These goals are: improving access to good healthy food, promoting healthy eating habits, building community, providing nutrition information, and advocating for a sustainable economy by purchasing from local farmers. Twice a month, individuals place orders for boxes with volunteer co-ordinators in their neighbourhood. Customers pay \$10 to \$30 for their box depending on what type of box they order. CHEP's Good

Food Box staff purchase top quality fruit and vegetables with a focus in purchasing locally grown food. Food that cannot be purchased through a local grower is purchased through a locally run fruit and vegetable wholesaler. From August 2002 to July 2003, we purchased 75,084 pounds of local produce and another 206,879 pounds of produce from the local wholesaler. The content of the boxes change each delivery, depending on what is in season and what produce is priced reasonably at the time. The produce is dropped off to our packing site on delivery day and the boxes are packed by school groups, community members, and staff. Good Food Box drivers then deliver the boxes to the neighbourhood drop-off points where the volunteer co-ordinators ensure that customers pick up their boxes. Established in 1997 with 40 boxes a month, we now deliver between 800-1,200 boxes in and around Saskatoon each month. From August 2002 to July 2003, volunteers and staff packed 14,208 boxes of fresh, good quality produce!

### What kind of boxes are offered?

We have five different types of boxes. The regular fruit and vegetable box is \$15 and contains approximately 25 pounds of produce with about 12 different types of fruit and veggies. The small fruit and veggie box is \$10 and contains approximately 15 pounds of produce with about 10 different types of fruit and veggies. The large fruit box is about 20 pounds of fruit with 6 types of fruit and the small fruit box is about 10 pounds with 5 types of fruit.

Our fifth type of box is called the eco box. Launched last May, this box highlights local pesticide free fruit and vegetables with certified organic fruit and vegetables from outside the province. For \$30, this box contains about 25 pounds of fresh produce, with at least 10 different types of fruits and veggies. We purchase from local producers when possible, as well as bulk from Steep Hill Co-op when the need arises.

### How can I get involved?

The best thing about the Good Food Box is that it is available for EVERYONE regardless of income or circumstance. Individuals and families participate in our program for a variety of reasons. Some participate because the food is cheaper than if you were to get it at the grocery store. Others participate because they like to support a local economy and food security initiative. Call Marilyn or Debra at 655-5619 or 655-5387 for more information on the closest drop-off point to your home. We also have a number of volunteer opportunities ranging from packing boxes to co-ordinating a drop-off point for your neighbourhood or workplace. If you are a member of Steep Hill Food Co-op, your working membership volunteer hours can be made with us! Hope to hear from you soon! ☀️

# Native Plant Society of Saskatchewan Rare Plant Inventory Workshops

- Garth Wruck, NPSS Coordinator

The Native Plant Society of Saskatchewan (NPSS) has partnered with Nature Saskatchewan to submit a joint proposal to the Habitat Stewardship Program for funding. If the application is successful, along with funds provided by Saskatchewan Environment, the NPSS may be offering as many as 4 workshops on general plant identification, rare plant survey methodology and rare plant identification. Participants will be supplied with resource materials such as fact sheets that contain images and descriptions of rare plants species. They will also be provided with a list of desirable survey locations and encouraged to conduct surveys throughout the growing season and submit data to the NPSS. Each individual who completes and submits at least one survey will receive a \$50 honorarium. The workshops are free of charge and are open to any interested individual. These workshops will be great opportunities for professional development in obtaining highly desirable skills.

Nature Saskatchewan operates the stewardship program titled: Rare Plant Rescue Program (RPR). This is a stewardship program that provides landowners, with rare plants on their property, with technical assistance, information on such things as management, legislation and recognition for their stewardship to rare plants. It is proposed that where rare plants are surveyed on private land, the landowner will be given the opportunity to join the RPR. Such a program brings landowners and conservation groups together to help protect plant species at risk and commend landowners who acknowledge rare plants with their efforts to protect them. Secondly, we need to collect as much information on these plants as we can to better understand why they are rare and what can be done to make sure they are not lost. The workshop components of the project are expected to run sometime in March with possibly two workshops in Saskatoon, one in Regina and possibly one in Swift Current. If you think you would like to participate or wish to get more information, contact Garth Wruck at the NPSS office. Please send an email to: [info@npss.sk.ca](mailto:info@npss.sk.ca) indicating your interest and include your contact information or send the information via fax (306) 258-2244 or call 668-3940. Hope to see you there!

## Join the Network!

New members are welcome. Membership is open to non-governmental, not-for-profit organizations involved in environmental protection activities. Individuals who support the Network's objectives may also join as subscribers but may not vote or hold office.

Name/Contact Person .....

Organization .....

Title .....

Address .....

Postal Code .....

Phone ..... Fax .....
